Good game for young children. However it has no educational value, and very few actual puzzles. It's more of an interactive story than a puzzle game.

Pros:

- If a puzzle is too hard, the player can just click the "Esc" button, and move on to the next one.
- The player can replay any puzzle that they have already done/unlocked, as many times as they want.
- Good for parents to play with their child. The parent can read the story/instructions and give the child hints, while the child handles the mouse.
- The art is good, with large characters and semi-detailed backgrounds, perfect for children.
- The story is simple and understandable, with no offensive content, and the writing has correct spelling and correct word usage.
- There is a "parents only" area in the menu, which contains the reset button, and the facebook link. You need to select the correct numbers to get into the parents area, so very young children won't be able to accidentally mess their game up.

Cons:

- The puzzle with the Professor's electric cables is pretty glitchy and the cables sometimes won't connect, and othertimes they will float off of the screen.
- The music is simple and not too annoying, but the sound effects are loud and often very irritating.
- This game does not read the story outloud. Kids who can't read will still be able to click til the writing goes away and then do the 'puzzles', but without knowing what or why.
- There are very few clickable background items, and no fun jokes for kids who click around on the screen. These features were my favourite part of computer games growing up.
- Most children will be unable to complete some of the achievements (many adults have trouble beating the timed achievements), and many of the achievements revolve around performing actions 100 times - requiring either grinding, or multiple playthroughs to achieve. Not a big deal for most, but it is part of the game, so I will include it in my review. This game might introduce your kids to achievement hunting hahaha!. I got it for a really low price. Definitely worth it.

Unfortunately i don't have a 3D printer.. Rogue-like-like-like genre.

Pros:

- Neat UI;
- Well-designed;

Cons:

- Poor combat & upgrade systems;
- Repetitive gameplay (including quests and RWG);
- Disturbing music;
- Limited servers (600 x 2 players);
- No custom game/difficulty settings;

To be noticed:

- Death changes nothing;
  - Unable to customize character;
  - No offline mode;
- Inertia is a very fast paced parcou game with some great physics. It has a unique graphic style and breathtaking polishing. However, the community levels can quite often be broken and should require more playthroughs of the level by the curator before being published.. Good tower defense game, with high playablity and many playable factors. Work fine in Windows but crashed in my Macbook pro.. This game is AMAZING!!!

Pros:

Super friendly community  
great graphics  
season rankings  
You don't have to play ranked matches  
completely customizable spell loadouts

Diverse character outfits and accessories  
new content updates

Cons:

Minor bugs

Since it's new on steam, slightly longer waiting times for a match during certain hours.

I highly recommend this if you like magic-type vr games.. Great Game. No Voice-Overs Though.. The Best <3. I love this soundtrack so much.... this is the best vr game i have ever played but if this game and blade and sorcery were to be combined you would have the most immersive medieval fantasy game ever totally recommend it.

This game got my attention since I love shooting alien scum and VR shooters and this game offers it for very good prize, cool weapons and powerups, smooth addictive gameplay, location and enemies variety. Took me over hour to finish it on first try, you have to master usage of guns and shield to survive. Felt badass shooting down big ship with minigun holding under my leg as debris flew above my head :D. Developer says I have no internet. So I shouldn't be able to give any review at all, but I somehow can.

Still could not play this game up to this day because of "connection to master server lost".

Edit: The non-steam version (from their website) works without issues.

Edit 2.0: Because of their customer support I can not recommend this game/company at all. Wish I could refund.. this game will make u hate your computer!. Very cute and easy relaxing puzzle game. Rather interesting game, Not my usual genre but I can't help but love it. the blend of slide scroller mixed with 3D works very well. Apart from a few hiccups with the game loading, on the first launch(and never again). It's well optimized with smooth gameplay, and a quirky story.

good game to play with a mug coffee.. One of the best in the genre of card games. Exciting gameplay, an interesting storyline and the most important convenient management. Absolutely awful! What was I thinking...
