A new version of the first hold, King Dugan's Dungeon. It is not extremely hard in terms of drod holds, definitely hold and a few puzzles show their age if you compare them to others. The steam release has nice updates. I finished the previous version of this hold. It was fun. Very rewarding, very time taking. I'm happy I did so.. KDD is the first DROD game, redone in the new DROD engine. While it's still stronger than most grid-based puzzlers by a huge margin, you're looking at a decade's old design. The levels are ugly, way too big and packed with empty space out the wazoo, and the game is almost a total snoozefest for the first 3-5 chapters. There's a reason why you're buying Gunthro first before picking up this game. Gunthro is a far more refined design. That said, once you soldier past the snoozefests, you do see the puzzle skills that started this whole franchise on display. And this is a massive "DLC," given that it is a full length game with hundreds of puzzles, later ones even meticulously designed. Worth it if you want more DROD but just understand it is a rougher around the edges early design.. so many puzzles imm play it and theres puzzles. KDD is the first DROD game, redone in the new DROD engine. While it's still stronger than most grid-

based puzzlers by a huge margin, you're looking at a decade's old design.
