About This Game

Deepworld is a massively-multiplayer 2D crafting adventure game. Mine and craft your way through a persistent online universe where there's always something new to discover!

- Find your way through mountains, caves, and ruins filled with danger and reward, or venture into cities built by fellow players.
- Deepworld is always online in the cloud, so it's easy to hop on and play with your friends! Follow them in-game and easily find them when you play.
- Mine and craft hundreds of different items with Deepworld's easy inventory system. Place them anywhere in the world to build your very own cityscapes.
- Recover lost pieces of technology to build machines that restore the environment and make your world a more interesting place.
- Use different weapons and protective devices to fight monsters of the deep, mysterious automatons, and other players in PvP.
- Complete objectives to win achievements and earn XP and skill points, which can be used to beef up your character's

dexterity, mining ability, and more.

English

its a good game theres crafting,building,action i always play it with dad theres acid rain jetpack (they need to add jumping). What a \u2665\u2665\u2665\u2665\u2665 game. I could not even figure out what i was supposed to do,. At least add some kind of instancing or insanely big maps so that one get to have ones own sandbox.. This game is a mix of Growtopia and Terraria, it's really fun to play, and it's even better to play with friends. Fun game, but I had issues getting certain quests to work right.. boring thats all i have to say build and mine and kill mobs. it's a very good game!
